Interested in EasyMaker? Try it for free

Many people are interested in EasyMaker. They want to know how it works and if it can help them make their information clearer. The great news is, you can try EasyMaker for free.

In our video, I explore the latest version of EasyMaker with Rachel from SpeakEasy N.O.W. This charity supports people with learning disabilities in Herefordshire and Worcestershire. They use Easy Read in their work every day. Rachel and her team were among the first to see EasyMaker in action. We've worked with them since last year as part of the Newton Project. This project looks at how AI affects people with learning disabilities, highlights the importance of Easy Read, and tests EasyMaker as it develops. Watch the video to hear Rachel's thoughts on our updates.

See it for yourself

When we at Photosymbols started building an AI

tool to turn complex text into Easy Read quickly, I didn't know what to expect. I was new to AI and used to spending lots of time simplifying text, choosing images, and arranging layouts for Easy Read documents. It wasn't until I tried EasyMaker myself that I saw its potential.

We want you to have the same experience. EasyMaker is free to test, so you can see how it might work for you. You can upload a document, paste some text, or link to a webpage, and EasyMaker will guide you through the process. It can even create a document for you. Once you have a draft, you can customise the text and images, and it can even create AI images for free.

More than just a PDF

EasyMaker offers more than just Easy Read on paper. You can explore different accessible formats on the web and mobile for free. When you're ready to share, send one simple link. The people you share with can choose from audio,

Plain English, or Easy Read formats. If they want more details, our AI assistant can help them find what they need.

Want to see what EasyMaker can do for you? Try it for free today.

Don't miss our follow-up video next week. Rachel will talk about why Easy Read is important and how EasyMaker can make a real difference.
